VIZIYA offers asset management add-on products and services. that enhance and extend the existing capabilities of **Oracle eAM** and **SAP Plant Maintenance (PM)** modules.

Our objective is to help you maximize the ROI of your Oracle eAM or SAP PM Module, by providing commercial off-the-shelf software that fits seamlessly with the baseline application. Each product is uniquely designed to take full advantage of native functionality while providing new or improved capabilities.

Viziya's #1 Differentiator ...  
we capitalize on the synergy of:

Whether you are currently using your asset management module, in the middle of implementation, or still evaluating its potential, we can help. Functional assessment, process development and optimization, data migration or filling missing functionality with add-on products. VIZIYA can meet your needs. Our people are experts in eAM business processes with an in-depth knowledge of the technical architecture that supports maintenance management functionality.

At VIZIYA, we believe it's not just about technology, but rather, it's about using the technology, combined with our years of asset management expertise to guide you and deliver precisely what you need to run your business. We have had the privilege of assisting many global industrial leaders in optimizing their asset management modules and we bring this experience to every single engagement.
