

WorkAlign® Mobile eAM

VIZIYA WorkAlign® Mobile delivers robust capabilities and maximizes the utilization of field workers.

With easy access to information throughout the EAM work flow, workers can efficiently capture work order data, materials activities, asset history and measurements.

Wrench time increases and desk time decreases by providing access to comprehensive, maintenance-specific functionality on intuitive screens that are tailor-made for popular mobile devices like Windows and Apple IOS.

Clean, simple, role-based screens and process flows provide the visibility and functionality required from the field, without all the clutter and complexities of typical ERP-based solutions. Ready access from the field to detailed, step-by-step instructions, drawings, and asset history enhances the safety and efficiency of maintenance processes. Asset availability is improved with accurate and up-to-date work order notifications and confirmations.

WorkAlign® Mobile improves the quality and timeliness of maintenance information because there is no lag time associated with data entry. All data is captured at the source, ensuring completeness for compliance reporting. Quick, out-of-the-box implementation and easy configuration have you up and running in just a few days, without costly consulting or customization. As a seamless add-on solution tightly tied to Oracle, VIZIYA's Mobile for EAM product gives you the best of both worlds - comprehensive mobile functionality coupled with VIZIYA's industry-leading ERP interface.

BENEFITS

Drive Asset Utilization

- Improve timeliness and accuracy of work order notifications to improve asset availability

Manage Risk

- Drive user adoption and accountability with an intuitive easy to use solution
- Improve Safety compliance with ready access to docs, drawings and task lists

Drive Cost Savings

- Free Planners and Schedulers to work on process improvement initiatives
- Improve craft utilization with easy access to documentation, complete notifications, time cards and confirmations with less time

FEATURES

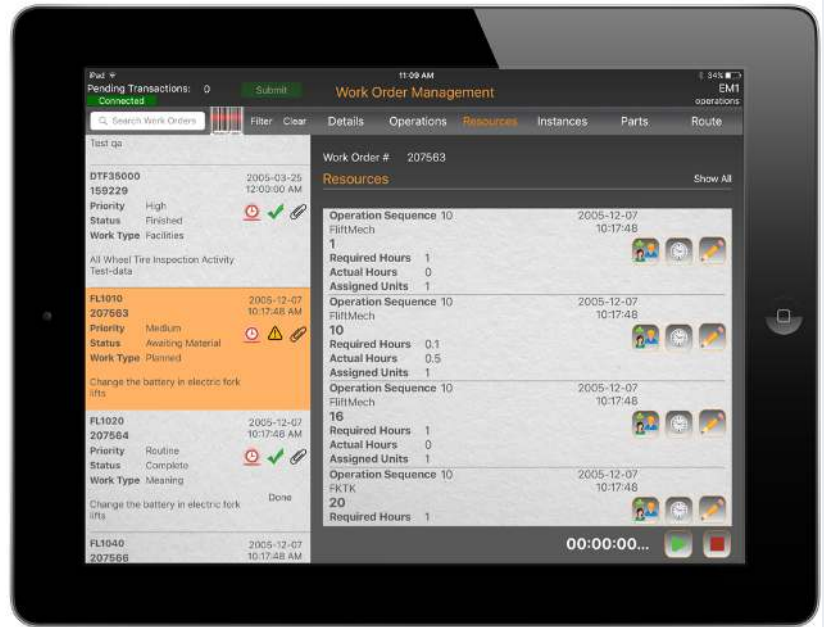

- **Out-of-the-Box** Comprehensive Solution
- **Quick** Implementation
- **Robust feature set with extensive coverage of the Oracle eAM system** – work management, notification management, inventory management, asset management
- **Intuitive user interface** drives utilization in the field
- **Support for devices maintenance users want:** Apple IOS, Windows
- **Role-based** screens and process flows to match maintenance-specific needs
- **Support** for connected and disconnected operations
- **Easily traverse** asset hierarchy
- **Complete Solution from VIZIYA:** Maintenance Scheduling, Analytics, Warranty, Mobile, System Integration, Consulting

KEY FEATURES
