

Empowering ERP Asset Management Solutions

VIZIYA helps companies optimize their maintenance and asset performance with bolt-on software solutions and services. The WorkAlign® Suite enhances your ERP, helping customers align and improve their maintenance and business processes.

VIZIYA delivers world-class products and services to industry leading Fortune 1000 companies like Barrick Gold, Johnsonville Sausage, and Alcoa, as well as public sector organizations like the Chicago Public Schools.

Our Value

VIZIYA provides easy to use, integrated bolt-on maintenance solutions that align and enhance business and maintenance processes. Our software focuses on asset criticality, urgency, and PM compliance to help achieve business goals. As one of the largest partners in the maintenance space, the team at VIZIYA knows how to leverage your ERP to establish best practice maintenance solutions, and has a proven history of building advanced maintenance software that complements your ERP's Maintenance solution.

VIZIYA at a Glance

- Delivers "out of the box" fully integrated bolt-on maintenance products
- Advanced features surpass native ERP capabilities
- Maintains "one source of truth" for maintenance data
- Our products are available On-Premise, or in the Cloud.
- Fully supported, commercial products with comprehensive ongoing software support

How we Help Customers

There are three common situations where Maintenance and Reliability teams look to VIZIYA:

1. They require extended maintenance functionality to support their business processes and to maximize value and ROI.
2. They aren't getting full value from their ERP's maintenance solution because of a lack of adoption and/or poor configuration, and they need professional support and training.
3. An ERP customer who is extending their footprint by implementing additional modules, and requires assistance to develop and deliver a best practice solution for maintenance.

VIZIYA - Built for Success with your ERP

VIZIYA's products and services portfolio has been designed to meet the needs of the most demanding maintenance organizations across the globe.

Our solutions are not standalone but rather a true bolt-on that is fully integrated into your ERP system. We leverage APIs so customers don't need a separate database or an integration bridge. Our "one source of truth" design keeps your data where it should be – in your ERP system database.

VIZIYA is a trusted partner of the major ERP companies, and maintains the most complete understanding of their capabilities in the industry

“ Most enterprises will see measurable improvements in equipment utilization and maintenance effectiveness resulting from the improved functionality. ”

-Gartner

WorkAlign® Suite

Scheduler makes sure that critical work is only scheduled for the right assets, at the right time, with the right resources – resulting in fewer downtimes.

Analytics jump starts continuous improvement with thousands of data elements mapped that drive maintenance best practice through reporting and dashboards.

IloT connects your real-time sensor data to your ERP, applying “what then” steps that makes the data actionable, and closes the loop by sharing data with your data historian.

Mobile connects remote workers to maintenance information throughout the business putting your entire Maintenance and Inventory systems in the palm of your hand.

Maintenance Budgeting allows for asset-based budgets to be created, including zero-based budgets, with real-time views of actual maintenance history and future plans.

Warranty Tracker links warrantable inventory items and assets to work orders, automates warranty claims for cost recovery, and helps drive supplier accountability.
